COVER PAGE Project Verification Report Form (VR) BASIC INFORMATION Name of approved UCR Project Verifier / Reference Naturelink Solutions Pvt. Ltd. No. **Type of Accreditation** ☐ CDM Accreditation ☐ ISO 14065 Accreditation □ UCR Approved Verifier Approved UCR Scopes and GHG Sectoral scopes for Sectoral Scope: 01 Energy **Project Verification** Industries Validity of UCR approval of Verifier November 2023 onwards Completion date of this VR 10/01/2024 Title of the project activity 11.998 MW bundle of Small Scale Hydro Power project by Government of Arunachal Pradesh. **Project reference no.** (as provided by UCR Program) 090 Name of Entity requesting verification service Government of Arunachal Pradesh (can be Project Owners themselves or any Entity having authorization of Project Owners, example aggregator.) Contact details of the representative of the Entity, Creduce Technologies Private requesting verification service Limited-(Focal Point assigned for all communications) Address: 2-O-13,14 Housing Board Colony, Banswara, Rajasthan - 327001, India. Country where project is located India **Applied methodologies** AMS-I.D.: "Grid connected renewable electricity (Approved methodologies by UCR Standard used) generation", version 18 UCR Standard **Project Verification Criteria:** \boxtimes Mandatory requirements to be assessed \boxtimes Applicable Approved Methodology Applicable Legal requirements /rules of host country

	Eligibility of the Project Type
	Start date of the Project activity
	Meet applicability conditions in the applied methodology
	□ Do No Harm Test
	Others (please mention below)
Project Verification Criteria:	☑ EnvironmentalSafeguards Standard and do-
Optional requirements to be assessed	no-harm criteria
	Social Safeguards Standard do-no-harm criteria
Project Verifier's Confirmation: The UCR Project Verifier has verified the UCR project activity and therefore confirms the following:	The UCR Project Verifier Naturelink, certifies the following with respect to the UCR Project Activity "11.998 MW bundle of Small Scale Hydro Power project by Government of Arunachal Pradesh
	The Project Owner has correctly described the Project Activity in the Project Concept Note (PCN)-1 Ver.2 (dated 27/03/2022) & Monitoring Report (MR)-2 Ver.1 including the applicability of the approved methodology A.M.S I. D and meets the methodology applicability conditions and has achieved the estimated GHG emission reductions, complies with the monitoring methodology and has

	calculated emission reductions estimates correctly and conservatively. Image: The Project Activity is likely to generate GHG emission reductions amounting to the estimated 8,308 tCO _{2e} , as indicated in the MR-2 Ver.1, which are additional to the reductions that are likely to occur in absence of the Project Activity and complies with all applicable UCR rules, including ISO 14064-2 and ISO 14064-3. Image: The Project Activity is not likely to cause any net-harm to the environment and/or society The Project Activity complies with all the applicable UCR rules and therefore recommends UCR Program to register the Project activity with
Project Varification Papart, reference number and	above mentioned labels.
Project Verification Report, reference number and date of approval	Verification Report UCR Project ID: 090

Project Verification Report

A. Executive Summary

The verification work has been contracted by project aggregator Creduce Technologies Pvt Ltd to perform an independent verification of its UCR project titled "11.998 MW bundle of Small-Scale Hydro Power project by Government of Arunachal Pradesh. UCR approved project ID:090, to establish number of CoUs generated by project over the crediting period from 01/01/2022 to 31/12/2022 (both days included).

Verification for the period : 01/01/2022 to 31/12/2022

In my opinion, the total GHG emission reductions over the crediting / verification period stated in the Monitoring Report (MR)-2 Ver.1, submitted to me is found to be correct and in line with the UCR guidelines.

The GHG emission reductions were calculated on the basis of UCR Protocols which draws reference from, Standard Baseline, AMS. I. D - Grid connected renewable electricity generation (Version 18.0). The verification was done remotely by way of video calls, phone calls and submission of documents for verification through emails.

I am able to certify that the emission reductions from the 11.998 MW bundle of Small Scale Hydro Power project by the Government of Arunachal Pradesh. UCR (UCR ID - 090) for the period 01/01/2022 to 31/12/2022 amounts to 8,308 CoUs (8,308 tCO₂eq).

Scope

The scope of the verification is the independent, objective review and ex post determination of the monitored reductions in GHG emission by the project activity.

- 1. The quality of data management and records of underlying data;
- 2. Completeness and accuracy of calculations and baseline emission reports;
- 3. Proper inclusion and documentation of all project locations.
- 4. Correct application of offset rules for filling Baseline Period data gaps;
- 5. Other data, methods, and procedures deemed necessary to establish the accuracy of emission reductions.
- 6. Agreement stating Assurance to avoid double accounting for the project to be verified, along with required proof.

The project is assessed against the requirements of the UCR programme verification Guidance Document, UCR Standard, UCR Programme Manual and related rules and guidelines. Due professional care has been exercised and ethical conduct has been followed by the assessment team during the verification process. The verification report is a fair presentation of the verification activity. The validation of project is not part of present assignment and projects deemed validated post registration by UCR.

Description of the Project

As described in the Project Concept Note-1 Ver.2 & Monitoring Report-2 Ver.1, the project activity involves hydro project of installed aggregated capacity of 11.998 MW at West Siang, Shi Yomi, Changlang and Anjaw district respectively. The details of the project activity are verified with the project report copy submitted for verification.

As mentioned in the Monitoring Report and Emission Reduction Calculation sheet submitted for the verification, the project replaces anthropogenic emissions of greenhouse gases (GHGs) estimated to be approximately 8,308 tCO2e for the said period under verification, there on displacing 9,232 MWh amount of electricity from the generation mix of power plants connected to the Indian electricity grid, which is mainly dominated by the fossil-fuel based power plant.

The project activity is a grid connected renewable energy generation project having capacity of less than 15 MW. The project is a small-scale activity. The methodology applied in the Monitoring Report is verified against the A.M.S I. D "Grid connected renewable electricity generation" version 18.0.

Verified total emission reductions achieved through the project activity during the monitoring period is summarised below:

Summary of the Project Activity and ERs Generated for the Monitoring Period			
Start date of this Monitoring Period	01/01/2022		
Carbon credits claimed up to 31/12/2022			
Total ERs generated (tCO2eq)	8,308 tCO ₂ eq		
Leakage	0		
Leakage	0		

B. Project Verification team, technical reviewer and approver:

No.	Role	Last	First	Affiliation	Involvement in		in

1.	Lead Verifier & Technical Expert	Amin	Shardul	Head Operations- Naturelink Solutions Pvt. Ltd.	Yes	No	Yes

C. Means of Project Verification

Desk/document review

The project documents submitted to UCR approved verifier Naturelink Solutions Pvt. Ltd. was reviewed by the technical expert and validated by the verifier. The documents reviewed involves verification of legal status of individual project owners for consistency, project related documents like installation and commissioning of equipment used in project activity. Environmental clearances from state or central pollution control board Consent to establish and operate, monitoring related meters/parameters equipment measuring instruments and their calibration records, to establish running of equipment for the crediting period etc.

The PCN-1 Ver.2 is made available to verifier post approval by UCR which is considered as validated documents and the content of validated PCN-1 Ver.2 & MR-2 Ver.1 is considered as record wherever required. Further, the communication agreement made between project owner and the project aggregator is the document of the UCR registry hence the project aggregator is treated as an authorized representative of the project owner. All the documents submitted by project aggregator to verifier is treated as documents submission on behalf of project owner.

The list of submitted document is available in subsequent section of this verification report under section "Document reviewed or referenced"-section I.

On-Site inspection- Not applicable.

	off-site on: DD/MM/YYYY IM/YYYY	Not applicable as per UCR guideline site visit not conthis verification activity.		ducted for
No.	Activity performed Off-Site		Site location	Date
1.				

Interviews: Not applicable

As per UCR guideline the site visit was not conducted during the course of verification instead online interview was conducted.

No.	Interview		Date	Subject	
	Last name	First name	Affiliation		

1.	Jummar	Kamdak	Chief Engineer, DHPD	27/10/2023	Project Capacity, location, metering details and its calibration
2.	Rathore	Natasha	Consultant, Creduce Technologies Pvt. Ltd.	27/10/2023	PCN, MR, Emission factor and Emission reduction calculation

Sampling approach:

Out of 19 project sites, 3 sample sites were selected for the verification namely Teepani MHS (2 x 250 kW), Solegamang MHS (1 x 50 kW) and Sirikorong MHS (2 x 250 kW). For the verification of monitoring parameter of electricity generation departmental database was made available to verifier and the same has been verified. Data are being monitored on monthly basis. Since physical visit of installation site was not conducted, meter photos, and Technical Specification/Purchase Order Copies are used for the verification.

D. Project Verification findings

Identification and eligibility of project type

Means of Project Verification	Project has taken reference of CDM methodology AMS-I D, version 18 Grid Connected Renewable Electricity Generation.
Findings	 Project activity is described through UCR approved PCN-1 Ver.2 & MR-2 Ver.1. UCR project communication agreement clearly defines the Project Proponent and Project Aggregator.
Conclusion	The UCR approved format is used for description and project meets the requirement of UCR verification standard and UCR project standard. UCR project communication agreement submitted to verifier and the same has been verified. Methodology referenced and applied appropriately describing the project type. The eligibility of project aggregator is verified using UCR communication agreement, Project correctly applies the verification standard, UCR project standard and UCR regulations. The project activity is overall meeting the requirements of UCR Verification standard and UCR project standard.

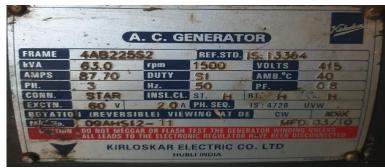

General description of project activity

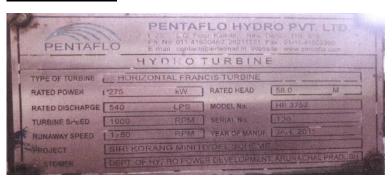

Solegamang MHS

Sirikorong MHS

	RAME SCOTZ/I BATING SITO IS 4722-1992 EXTR. AC STE
	The power evacuation at the Substation is confirmed by Electricity generation sheet.
Findings	 Project Commissioning date is mentioned in the commissioning certificate. Turbine Capacity is same as mentioned in the name plate and technical specifications. Project implementation and sale of energy abide the power purchase agreement.
Conclusion	The description of the project activity is verified to be true based on the review of PCN-1 Ver.2, MR-2 Ver.1, Commissioning Certificate, Purchase Order Copies and Technical Specification sheet.

Application and selection of methodologies and standardized baselines

(.a.i) Application of methodology and standardized baselines

Means of Project Verification	Project has taken reference of CDM methodology A.M.S I.D. CDM website is referred to check the latest version of the methodology. For the applicability mentioned in the PCN-1 Ver.2 and MR-2 Ver.1, Turbine Specification, Commissioning certificate, and Detailed Project Report documents were referred.
Findings	The methodology applied is applicable for the project activity.
Conclusion	Methodology application is appropriate meeting the requirements of UCR and its standardized baseline. The methodology version is correct and valid. Referenced methodology is applicable to project activity.

(.a.ii) Clarification on applicability of methodology, tool and/or standardized baseline

Means of Project Verification	The documents reviewed are A.M.S I. D "Grid connected renewable electricity generation" version 18, UCR Program standard, and UCR Verification Standard.
Findings	Emission factor calculated using the methodology is higher than UCR standard recommends.
Conclusion	Methodology has not been applied "as it is" rather it is referenced. The emission factor considered for the calculation of the emission reductions is verified with the UCR Program Standard. The total installed electrical energy generation capacity of the project equipment

does not exceed 15 MW thus meeting the requirement of small-scale
project.

(.a.iii) Project boundary, sources and GHGs

Means of Project Verification	Letter from CPCB dated 07/03/2016 No. B-29012/ESS(CPA)/2015-16. PCN-1 Ver.2 section B.4 & MR-2 Ver.1 section C.4.
Findings	Project boundary is appropriately defined in PCN-1 Ver.2 & MR-2 Ver.1 which is physical and geographical site of power house.
Conclusion	Project boundary is correctly defined in revised PCN-1 Ver.2 & MR-2 Ver.1. GHG source correctly identified and reported. The project meets the requirements of UCR project standard, Verification standard and methodology requirements for boundary, GHG source.

(.a.iv) Baseline scenario

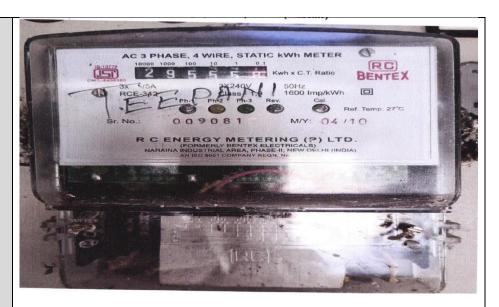

Means of Project Verification	PCN-1 Ver.2 Section B.5 & MR-2 Ver.1 section B.3 and General Project Eligibility Criteria and Guidance, UCR Standard.
Findings	Declared information is correct and verified.
Conclusion	Baseline scenario is appropriately described. The conservative or default value for emission is considered. The baseline scenario is in accordance with UCR project verification standard and UCR project standard.

(.a.v) Estimation of emission reductions or net anthropogenic removal

Means of Project Verification	Joint Meter Reading Reports, and General Project Eligibility Criteria and Guidance, UCR Standard, page 4.
Findings	Declared information is correct and verified.
Conclusion	Emission reductions are correctly calculated. The data used are either monitored at plant and hence the emission reduction is reported correctly and meets the requirements of UCR verification standard and UCR project standard.

(.a.vi) Monitoring Report

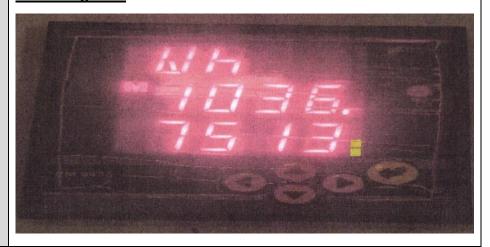

Energy meters installed at the site:
Teepani MHS

Solegamang MHS

Sirikorong MHS

Findings

Declared information is correct and verified.

Conclusion

Monitoring parameter as reported through MR-2 Ver.1 adequately represents the parameters relevant to emission reduction calculation. Department of Hydro Power Development, Arunachal Pradesh ensures the accuracy of data reported. The number of CoUs generation is calculated based on this accurately reported data. The calculation was done using excel sheet where all the parameters reported. The

emission factor for electricity is as per UCR standard for electricity
component. Based on monitoring and emission reduction calculations
are correctly calculated and reported. The monitoring report meets the
requirements of UCR project verification requirements.

Start date, crediting period and duration

Means of Project Verification	MR-2 Ver.1, Purchase order of Turbine and technical Specification sheet, Commissioning certificate, and Detailed Project Report documents were referred.
Findings	Declared information is correct and verified.
Conclusion	The start date, crediting period and project duration reported correctly and this meets the requirements of the UCR verification standard and UCR project standard.

Positive Environmental impacts

Means of Project Verification	MR-2 Ver.1
Findings	Declared information is correct and verified.
Conclusion	The positive environmental impact meets the requirement of UCR verification standard and UCR project standard.

Project Owner- Identification and communication

Means of Project Verification	PCN-1 Ver.2, Communication Agreement, MR-2 Ver.1, Purchase order of Turbine, Commissioning certificate, Power Purchase Agreement.
Findings	Declared information is correct and verified.
Conclusion	Project owner identified through communication agreement signed between PP and PA. Equipment purchase order and commission verified. Also, legal document like Power Purchase Agreement clearly establishes the project owner. The identification and communication correctly meet the requirement of project verification and UCR project standard.

Positive Social Impact

Means of Project Verification	Project has provided temporary employment to local people during its installation and commissioning. Also post commissioning some of people have employed permanently and local people were engaged leading to social financial benefit to surrounding. Overall social impact of project implementation is positive on the surrounding area.
Findings	

Conclusion	Project has overall positive social impact.
00	

Sustainable development aspects (if any)

Means of Project Verification	Not Applicable
Findings	
Conclusion	The Project has capability to address SDG 7 Affordable and Clean Energy and SDG 13 Climate Action

E. Internal quality control:

- Due professional care has been taken while reviewing the submitted document.
- There is no conflict of interest as the verifier has no other engagement with either the aggregator or project owner directly or indirectly.
- The verification team consists of experience personnel.
- Technical review is performed by experienced and independent person.

F. Project Verification opinion:

Considering the above-mentioned verification conducted on the basis of UCR Protocol, which draws reference from UCR Protocol Standard Baseline, AMS.I. D – Grid connected renewable electricity generation (Version 18.0), the documents submitted during the verification including the data, Project Concept Note (PCN)-1 Ver.2 & Monitoring Report (MR)-2 Ver.1, I am able to certify that the emission reductions from the project - 11.998 MW bundle of Small Scale Hydro Power project by Government of Arunachal Pradesh. (UCR ID – 090) for the period 01/01/2022 to 31/12/2022 amounts to 8,308 CoUs (8,308 tCO2eq).
